

## Beos

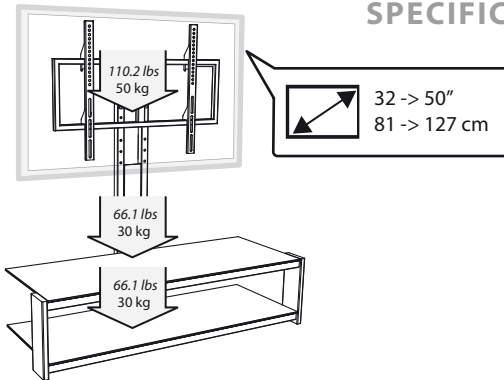

Thanks to an elegant glossy black finish and to its robustness, Beos is now a must have of the NorStone range.

Its universal brackets welcome a screen from 32 to 50 inches on a rotating head with adjustable height, to enjoy the show the best way.

Two lacquered-glass shelves will store your AV equipment and a lacquered-steel column will hide your cables and give this furniture a contemporary elegance. With its plain and refined design, this furniture turns out to be more than functional... it also follows the current design trends.
