

D100 digital preamplifier

- The D100 is a remote controlled digital stereo preamplifier with five digital inputs and both variable and fixed volume audio output. It is a simple solution to add digital music to your existing McIntosh system.
- The D100 is also flexible enough to be used as a headphone amplifier. Just connect your digital sources and a pair of headphones for a personal listening experience.
- Advanced Quad Balanced, Digital-to-Analog circuitry is capable of handling the finest commercial recordings, assuring the best sound from your valuable music collection.
- D100's powerful built-in headphone amplifier will elevate the sound of your headphones to deliver the ultimate personal listening experience.

Digital Music with the Classic McIntosh Sound

For the Consumer's Protection:

In order to ensure the highest level of customer satisfaction, "new" McIntosh products may only be purchased over-the-counter or delivered and installed by an Authorized McIntosh Dealer. McIntosh products that are purchased over the Internet, by phone or mail order are presumed to be "used" and do not qualify for any McIntosh Warranty. McIntosh does not warrant, in any way, products that are purchased from anyone who is not an Authorized Dealer or products that have had their serial number altered or defaced.

Companion Products

The McIntosh MC302 Amplifier, C2300 Tube Preamplifier, MCD301 SACD/CD Player, MR88 AM/FM/XM/HD Tuner and XR100 Loudspeakers are logical companions for the D100 Digital Preamplifier. Your authorized dealer can provide additional information.
