

ProAc **RESPONSE D100**

The imposing new Response D100 takes on the mantle of flagship model from our legendary Response Four, which has delighted discerning audiophiles for the last twelve years.

Only the development of an entirely new generation of sensitive drive units has allowed the Fours to be eclipsed – these new drivers produce a much more dynamic sound with greater efficiency, giving high sound levels without the need for high output amplifiers. Good quality valve or Class A transistor amplifiers with an output as low as 10 watts will produce fine results.

Tall, slim, deep and elegant, these beautiful handcrafted cabinets, finished in real wood veneers, are exceptionally rigid. Cabinet colouration is kept to a minimum by covering inner surfaces with sound-deadening material, acoustic wadding and the use of resistive shelving. An entirely new porting system means that room placement of the cabinets is much less critical and the 100's will perform superbly in rooms of most layouts and sizes.

ProAc **RESPONSE D100**

*Awesome power
and detail from a
magnificent new
flagship model*

 **ProAc**
perfectly natural

ProAc **RESPONSE D100**

The innovative drive unit layout has ensured greater dispersion and a seamlessly integrated sound. Two new professional quality 10" bass drivers are mounted on the baffle either side of two exciting new 3" midrange units and a one-inch soft dome tweeter. Married by a complex HQC crossover network and connected by ProAc oxygen-free copper wiring, this formidable combination of drive units produces one of the most coherent and expansive sounds in modern hi-fi.

The D100's produce stunning music, effortlessly. The enhanced sensitivity extracts the tiniest detail from any recording without brightness or exaggeration. Greater bandwidth creates a huge soundstage, drawing in the listener and creating a concert hall experience, where the loudspeakers seem to melt from the scene.

Specification

Nominal Impedance	4 ohms
Recommended Amplifiers	10 to 750 watts
Frequency Response	20hz to 30Khz
Sensitivity	92db linear for 1 watt at 1 metre
Bass Driver (2)	Professional quality long-throw 10" (254mm) unit with large magnet assembly and 3" (75mm) ribbon wound voice coil
Midrange Driver (2)	Studio quality 3" (75mm) soft dome unit with double suspension
Tweeter	ProAc 1" (25mm) soft dome with special surround and front plate
Crossover	HQC crossover using dedicated components wired throughout with ProAc multi-strand oxygen-free copper cable. Split for optional bi-wiring and bi-amping.
Dimensions	65" (1650mm) high on plinths with conical feet 12" (305mm) wide 19" (482mm) deep
Weight	289 lbs (131kg) /cabinet
Mode	Floorstanding
Grille	Acoustically transparent crimplene
Finish	Available in the following real wood veneers: Black Ash, Maple, Mahogany, Cherry, Yew, Ebony, Bird's Eye Maple and Burr Oak. Other finishes to special order

* Due to our policy of continuous improvement all specifications are subject to change without notice. Cabinets pictured are finished in Yew real wood veneer. Since wood is a natural product, both colour and grain patterns may vary.
