

# SYMPHONIE SYS25A

Jewel of the range, the conductors of the Symphonie cable are made of OFHC strands of very high purity (Oxygen free copper, 99.999%) benefiting from a special treatment reducing loss to the maximum.

In order to eliminate any distortion and electromagnetic disturbance, the conductors benefit from a double insulating jacket made of polyvinyl chloride separated from an antistatic sheet. It is completed with an outer sheath of fabric for better protection.

Factory mounted, the banana plugs have a special treatment (silver plating) that minimizes distortion. Anodized aluminium caps ensure excellent signal protection.
