# Tempted by Multiroom Audio?

Anywhere in your home, indoors or out, there can be **music**.  
Or **sports**. Or **news**.  
All at the **touch of a button**.

**#1 Brand** in  
**Multiroom Audio\***

# Uncomplicate Your World

Back in the day, “hi-fi” systems were confined to one room, took up a lot of space and were understood by only one “expert” in the family.

Russound has a better idea. What if you could listen to music in any room at the push of a button? And what if the entire system – including the speakers – were practically invisible?

**The Russound UNO-S2 Keypad is quite simply the standard-bearer for full-featured, effortless control of multiroom audio systems.**

## #1 Brand in Multiroom Audio

A Russound multiroom audio system lets you enjoy music from several audio sources – such as XM® and Sirius® satellite tuners, CD players and even your iPod® – in any area of your home, inside or out, all at the same time.

Dad can relax to jazz on the patio. Mom can yoga to oldies in the bedroom. The kids can slam dance in the family room. With a multiroom system, everybody gets exactly what they want, when they want it.

Typically, all of the equipment is neatly concealed in one location, out of sight. All wiring is hidden within the walls. What you see are elegant keypads and speakers, intelligently designed to blend with the décor. You can even extend your music outdoors with weatherproof speakers.

At the push of a button, you're listening to your choice of music. Wherever. Whenever. Welcome to the uncomplicated world of Russound multiroom audio.

Russound®

# Unleash Your Music

In most homes, music is confined to one area at a time. You might listen to CDs in the living room, radio in the kitchen, and MP3 files in your home office. A Russound multiroom audio system unleashes your music, giving it the run of the house.

**The Russound iBridge Dock makes the iPod® a fully controllable music source in your multiroom system. It also charges the iPod.**

#1 Brand in  
Multiroom Audio

More than ever, the time is right for multi-room audio. The freedom to enjoy music anywhere at the push of a button is greatly enhanced by new and better choices for entertainment.

Take the Russound ST2 Smart Dual Tuner: It lets you enjoy XM® or Sirius® satellite radio plus conventional AM/FM. Our SMS3 Smart Media Server will automatically “rip”

and catalog large CD collections. And our iBridge Dock lets an iPod® integrate seamlessly into your system.

In the old days, figuring out how to use an assemblage of such high-tech gear would have caused a lot of hair-pulling. But in a Russound system, everything is controlled by our award-winning keypads, which are **really easy to use.**

**Russound®**

# Simplicity By Design

In the world of Russound multiroom audio, easy isn't everything – it's the **only** thing.

Russound product engineers are the best in the business. Given no constraints, they could probably design the bridge of a Space Shuttle.

One of several Russound multiroom audio solutions, the affordable A-BUS® system features intuitive amplified keypads that make for a streamlined installation.

## #1 Brand in Multiroom Audio

But they work for Russound, which means every product they design has to positively ooze simplicity.

As passionate engineers, they like to probe the limits of technology. But as responsible

product designers, they always put ease of use at the top of the list.

Which is exactly why, with Russound's award-winning keypads, music is always just a touch away.

 Russound®

# Let's Get Started

The award-winning UNO-TS2 Smart Color Touchscreen is available in both wall-mount and desktop versions.

Do you entertain often? Would you like to hear music outdoors? Do you have children living at home? Do you own an iPod®?

## #1 Brand in Multiroom Audio

These are the sorts of questions you can expect from professional audio/video installers. They need to know a bit about your life and home in order to design the ideal Russound multiroom audio system.

Russound offers systems that accommodate virtually any size home and any size

budget, from our versatile and feature-rich RNET® systems to our affordable A-BUS® amplified keypad systems.

Installers prefer equipment that is reliable, easy to install and easy to use. So it's no wonder they rank Russound as the #1 brand in multiroom audio.

The Russound logo consists of a stylized orange 'R' icon followed by the word 'Russound' in a bold, orange, sans-serif font.

# Ready. Set. Done.

Any time is a good time to add a Russound system, be it during renovation or in conjunction with other installations, such as a home theater, security or intercom system. New homes often are equipped with all the wiring necessary for a multiroom audio system. In existing homes or remodels, installers simply “pull” new wires behind the walls. In either case, your Russound system will be heard, but hardly seen.

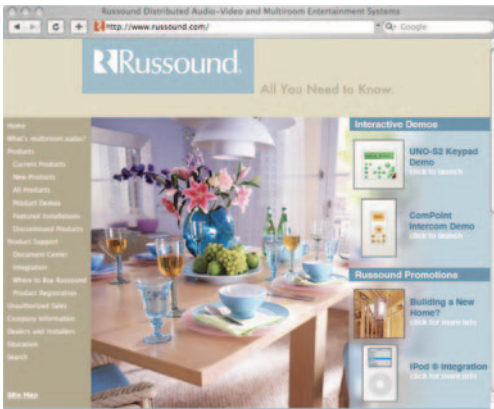

**Speakers can do more than play music. Russound's ComPoint Intercom System integrates with your multiroom system to provide room-to-room and whole-house communication without sacrificing sound quality or ease of use.**
