

RCM

High performance record cleaning machine

MSRP 699 € (incl. VAT)

Satin: ●

- Superfast & super strong vacuum motor
- Completely dry record within 1-2 rotations
- Superior motor for long lifetime
- Heavy puck for extra stability during cleaning
- Solid chip-lathed vacuum arm
- Replaceable self-adhesive arm strips
- Water-resistant platter with microporous rubber layer ensures the record's bottom stays clean
- 4 mm aluminium composite panels
- Big 2l tank for vacuumed cleaning liquid
- Removes static load of vinyl records
- Removes cleaning fluid residue free
- Eco-friendly non-alcoholic cleaning fluid
- High-end build-quality
- Made in Europe

Cleaning speed:	30 RPM
Included accessories:	Brush Vacuum Arm Self-Adhesive Arm Strip Aluminium Puck Cleaning Fluid (100ml) Power cable
Power connection:	110/120 or 230/240 Volt 50 or 60 Hz
Power consumption:	230V/800W, 120V/650W
Dimensions :	418x269x328 mm (W x H x D)
Weight:	8,6 kg

The REKKORD RCM

The new REKKORD RCM is a high-performance record cleaning machine with an ultra-powerful vacuum motor and cleaning efficiency that far exceeds the typical performance characteristics of other cleaners in this price-range.

To effectively clean the grooves, you need to wet clean the record. The REKKORD RCM completely cleans records in two rotations with its super powerful vacuum motor. The very best results are achieved with one rotation forward followed by one backwards.

To achieve the perfect cleaning, we also need a suitable cleaning fluid. Alcoholic cleaning fluids can destroy musical micro information of the grooves. That's the reason why we use an eco-friendly non-alcoholic cleaning fluid. The aluminium surface is able to withstand excessive fluid spill without compromising the chassis.

Made in Europe!

The heavy puck stabilizes the record during cleaning, so that the vacuum arm and motor can work evenly across the entire record surface. It also seals the record label from cleaning fluid to avoid damage on the label.

A water-resistant microporous rubber layer protects the platter from absorbing water, ensuring the record's bottom stays clean after every cleaning run.

The solid chip-lathed vacuum arm is mechanically stable and focuses all suction power directly onto the record surface without damaging it. Paired with self-adhesive arm strips, your records get cleaned perfectly.

The large internal container (2 liters) collects used fluid and is effortlessly easy to empty. When using the included cleaning solution, most of the fluid will evaporate in the container, meaning the container will almost never need to be emptied even after cleaning thousands of records.

The REKKORD RCM is made in Europe with high quality materials and an excellent build-quality. With many practical features and exceptional mechanical operation, it effectively combines industrial design appeal with an easy solution to great sound from your vinyl records.
