

VicStrip Square

PUBLIC SPACES / WORKSPACES

Description

VicStrip Square is wall and ceiling acoustic slat panel made from Laminated PET with a wood or matte strip look in a 60x60cm version, a more flexible and lightweight version of the long 240 and 270cm VicStrip.

The new size makes it possible to combine VicStrip in different sizes, complete surfaces that may not match the original sizes of the panels, and mix the panels in different dispositions or with other square acoustic panels. Being an acoustic panel shorter in size, VicStrip Square is even more flexible to cut and adjust to any setting.

Features

- Lightweight, making it easy to transport, and apply, offering less expensive shipment
- Easy to cut and readjust, it can be glued or screwed to walls and ceilings
- Free of wood, metal nails and with joints almost invisible
- Sustainable, manufactured with High Density VicPET Wool, a material produced mainly from recycled plastic bottles
- Low-emissions material, for good air quality, without irritating skin or eyes
- A green product suitable for green projects certification
- Sound absorption properties to control medium and high frequencies
- Fits perfectly with the rest of the Vicoustic product range

Performance

NRC: VicStrip applied directly on the wall: 0.45; VicStrip mounted on 45mm batten with VicPET Wool (40mm) behind the panels: 0.85.

Available Finishes*

* Different batches may show a color variation.
